

# EDUCATIONAL RECORD

**Educational  
Systems**

This form is an official transcript indicating your successful completion of an Individual Learning Program and the award of Continuing Education Units. Fill it out completely and return it with your Final Examination answer sheet. Be sure to sign and date this form in the space provided. No Certificate of Achievement or CEU credit can be awarded without this information. Please type or print plainly. Photocopies of this form will NOT be accepted.

Name (full) \_\_\_\_\_  
Address \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ Zip \_\_\_\_\_  
Telephone Number (include area code) \_\_\_\_\_  
Social Security Number \_\_\_\_\_  
Course Title \_\_\_\_\_  
Course Number \_\_\_\_\_  
Date of Final Examination \_\_\_\_\_

I hereby certify that I have fully completed all of the learning activities in this Individual Learning Program and have taken the final examination without the help of another individual.

Signed \_\_\_\_\_ Date \_\_\_\_\_

## EDUCATIONAL SURVEY

Dear Customer:

The purpose of this survey is to give you an opportunity to express your opinions and ideas about Heathkit Individual Learning Programs. The information that you provide here will help us to improve our existing programs and give us guidelines for developing new programs of interest to you. This feedback benefits you as well as Heathkit/Zenith Educational Systems.

Please fill out this form and return it to us with your final examination answers and Educational Record form. If you elect not to take the final examination, please use the envelope to return this form.

Douglas M. Bonham  
Director, Educational Products

1. What Individual Learning Program did you take? \_\_\_\_\_  
Fill in Model No.

2. What subjects would you like to see covered in future Heathkit Individual Learning Programs? \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

3. Was this course provided by your employer?

\_\_\_ Yes

\_\_\_ No

4. What was your reason for taking this course?

- Hobby
- Refresher course
- Reference
- Self Improvement
- Job Improvement
- Supplement school text
- Other (please specify): \_\_\_\_\_

5. How many Heathkit Continuing Education courses have you purchased?

- 1
- 2
- 3
- more than 3

6. Excluding trainers, how many Heathkit products have you purchased for use with your Heath Continuing Education program (Oscilloscope, Meters, etc.)?

- 1
- 2
- 3
- more than 3

7. Would you purchase a comprehensive, career-level, home study course that is priced in the \$500 to \$1000 range?

- Yes
- No

8. If you have any additional comments regarding this course of instruction or any of our Heathkit Individual Learning Programs or program ideas, please feel free to comment.

## EXAMINATION ANSWER SHEET

NAME \_\_\_\_\_

COURSE NUMBER \_\_\_\_\_

ADDRESS \_\_\_\_\_

DATE \_\_\_\_\_

CITY \_\_\_\_\_ STATE \_\_\_\_\_ ZIP \_\_\_\_\_

GRADE \_\_\_\_\_

**IMPORTANT NOTICE**

Photo copies of this answer sheet will **not** be graded.

### INSTRUCTIONS

1. Read each question in the Final Examination and select the correct answer choice. Place a check adjacent to your answer.
2. Transfer your answers to the opposite side of this answer sheet. Use a pencil to mark an X in the square corresponding to your answer choice. Be careful in transferring your answers. If you should mark the wrong square, erase it completely. Double check this answer sheet against your choices on the Final Examination.
3. Fill in the remainder of this answer sheet. Write your complete name and address in the spaces provided. Be sure to include the course number which appears at the top of the Final Examination.
4. Fill in the Educational Record form and sign it. This form becomes your official transcript. No Certificate of Achievement or CEU credit can be awarded without this form.
5. Fill in the Educational Survey form.
6. Mail this answer sheet, the Educational Record form and the Educational Survey form to Heathkit Continuing Education. Use the enclosed return envelope.

# Macro-86 ASSEMBLY LANGUAGE PROGRAMMING

EC-1201

## FINAL EXAMINATION

### Instructions

The following multiple choice examination is designed to test your understanding of the material presented in this Individual Learning Program. Besides telling us how well you have learned the subject, this exam provides you with a complete review of the program and serves as another learning activity to ensure your understanding of the material.

The final exam is optional, and you are not obligated to submit it. However, if you have completed the program, you will no doubt want to receive some recognition for this accomplishment. If you complete the exam and make a passing grade, you will receive an attractive Certificate of Achievement and Continuing Education Units (CEU) of credit. The CEU is a nationally recognized unit of credit that indicates your participation in and satisfactory completion of an adult continuing education course.

The final exam is an "open book" test. This means that you may refer to the text material or the exercises to assist you in obtaining your answers. You may also use any other reference material available to you. However, you may not receive help from another individual. The work must be entirely your own.

Copyright © 1984  
First Printing  
Heath Company  
Not Affiliated with D.C. Heath Inc.  
Printed in the United States of America  
597-3432

To take the exam, read each question completely and select the best answer. Place a check beside the answer (A, B, C, or D) that you feel is most correct. It is usually a good idea to read the question and each answer twice to be sure you fully understand what is being asked.

When you have answered all the questions, carefully transfer your answers to the Examination Answer Sheet. Place an "X" in the box labeled with your choice (A, B, C, or D). Be sure to fill in your name, address, and course number in the spaces provided.

Use only the answer sheet provided with the course material. Photocopies of this form will not be accepted.

Next, fill out and sign the Educational Record form. The information on this form will be retained at Heath in a transcript file. When your exam is graded, your grade will be recorded and the form signed. You may request a copy of your transcript for transfer of credit to your employer, an institution recognizing the CEU, or for your own use. Send \$1.00 for each copy requested to:

Transcript Records  
Heathkit/Zenith Educational Systems  
PO Box 1288  
Benton Harbor, Michigan 49022

Also fill out the Educational Survey form. This form provides us with useful feedback about you and your opinions. This information will help us to improve our present programs and develop new programs based on your needs and interests. Both the Educational Record form and the Educational Survey form must be returned with your Examination Answer Sheet. No certificate can be awarded without them.

Mail the Examination Answer Sheet, the Educational Record form, and the Educational Survey form using the return envelope provided for that purpose. Do not mail this Final Examination, as you will need it later to check your answers.

Your Answer Sheet will be graded and returned to you along with a summary of the correct answers. If you correctly answer 70 percent or more of the exam questions, you will be awarded the Certificate of Achievement and the appropriate Continuing Education Units of Credit.

---

## Examination

1. The instruction MOV AX,BX is an example of:
  - A. Immediate addressing.
  - B. Register addressing.
  - C. Direct addressing.
  - D. Base addressing.
  
2. The binary value 0011110010000111 is generally called a:
  - A. Bit.
  - B. Byte.
  - C. Word.
  - D. Doubleword.
  
3. The 8088 MPU contains \_\_\_\_\_ general registers that can be used as 8- or 16-bit registers.
  - A. 4
  - B. 8
  - C. 12
  - D. 13
  
4. The 8088 MPU contains \_\_\_\_\_ control and status flags in its Flag register.
  - A. 6
  - B. 9
  - C. 12
  - D. 16
  
5. The Instruction Pointer points to the:
  - A. Top of RAM.
  - B. Top of the Stack.
  - C. Next instruction to be executed.
  - D. Next memory location.

6. The assembler:
- A. Generates the object code.
  - B. Translates the object code.
  - C. Edits the source code.
  - D. Links the object code.
7. The term \_\_\_\_\_ refers to the instruction mnemonic in a source listing.
- A. Label.
  - B. Opcode.
  - C. Operand.
  - D. Comment.
8. Which of the following must be terminated with a colon in an instruction?
- A. Label.
  - B. Opcode.
  - C. Operand.
  - D. Name.
9. The maximum size of a label is:
- A. Seven letters.
  - B. Seven letters and symbols.
  - C. Fifteen letters and symbols.
  - D. Any number of letters and symbols up to the physical length of the displayed line.
10. The only valid method for determining the physical address of a memory location is add:
- A. The contents of the Data Segment register to the contents of the Instruction Pointer register.
  - B. The contents of the Stack Pointer register to the contents of the Code Segment register.
  - C. The effective address in the Base Pointer register to the contents of the Stack Segment register.
  - D. The effective address in the Base Pointer register to the contents of the Instruction Pointer register.

- 
11. The assembler directive ORG (origin):
- A. Must be used in an EXE program.
  - B. Must be used in a COM program.
  - C. Cannot be used as an optional assembler directive.
  - D. Is used to specify a segment base address.
12. The assembler directive \_\_\_\_\_ can be used to reserve a byte in memory and define the contents of that space.
- A. DUP
  - B. DB
  - C. DW
  - D. DD
13. Every program must end with the \_\_\_\_\_ directive.
- A. END
  - B. ENDM
  - C. ENDP
  - D. ENDS
14. If the symbol ALPHA is equated to 36H, the instruction MOV AX,ALPHA is an example of:
- A. Immediate addressing.
  - B. Register addressing.
  - C. Direct addressing.
  - D. Base addressing.
15. The term MOD is an example of:
- A. An offset operator.
  - B. A macro operator.
  - C. A logic operator.
  - D. An arithmetic operator.
16. To determine the remainder from an arithmetic operation, use the \_\_\_\_\_ operator.
- A. -
  - B. \*
  - C. /
  - D. MOD

17. The \_\_\_\_\_ register does not have to be initialized in a program.
- A. CS
  - B. DS
  - C. ES
  - D. SS
18. A short jump is always:
- A. An intersegment jump.
  - B. An intrasegment jump.
  - C. A conditional jump.
  - D. A direct jump.
19. A far jump is always:
- A. An intersegment jump.
  - B. An intrasegment jump.
  - C. A conditional jump.
  - D. A direct jump.
20. Which of the following instruction pairs perform the same operation?
- A. JA/JNB
  - B. JNLE/JNG
  - C. JNL/JNGE
  - D. JB/JNAE
21. After the following two instructions are executed, which jump will be taken?
- ```
MOV AX, 3CH
ADD AX, 3CH
```
- A. JS
  - B. JP
  - C. JNG
  - D. JB

- 
22. Which of the following jump instructions does not rely on the condition of the Flag register to determine if the jump is taken?
- A. JNLE
  - B. JNZ
  - C. JCXZ
  - D. JNGE
23. Which of the following loop instructions is not a conditional loop?
- A. LOOP
  - B. LOOPE
  - C. LOOPNE
  - D. LOOPNZ
24. The \_\_\_\_\_ flag is always tested before a conditional loop is taken.
- A. Carry
  - B. Overflow
  - C. Sign
  - D. Zero
25. Which of the following registers defaults to the stack segment?
- A. BX
  - B. BP
  - C. SI
  - D. DI
26. Which of the following instructions does not modify the contents of the register specified in the operands?
- A. NEG AX
  - B. CMP AX,03CH
  - C. DEC AX
  - D. INC AX

- 
27. Which of the following instructions will complement the Carry flag?
- A. CMC
  - B. CMP
  - C. STC
  - D. CLC
28. The number of loops taken by a loop instruction is determined by the count in the \_\_\_\_\_ register.
- A. AX
  - B. BX
  - C. CX
  - D. DX
29. You should use the \_\_\_\_\_ instruction to branch to a subroutine.
- A. JMP
  - B. RET
  - C. JCXZ
  - D. CALL
30. A \_\_\_\_\_ instruction will cause the Stack Pointer to increment four times.
- A. Near call.
  - B. Far call.
  - C. Near return.
  - D. Far return.
31. The \_\_\_\_\_ register points to the top of the Stack.
- A. SS
  - B. iP
  - C. SP
  - D. BP

- 
32. Which of the following instructions can be used to load a value into the Flag register?
- A. PUSH
  - B. POP
  - C. PUSHF
  - D. POPF
33. Which of the following instructions causes only the contents of the IP to be saved on the stack?
- A. JMP
  - B. CALL
  - C. PUSH
  - D. RET
34. Assuming a near procedure, which of the following instructions will cause the Stack Pointer register to be incremented six times?
- A. POP
  - B. RET 2
  - C. RET 4
  - D. RET 6
35. Which of the following directives will allow you to combine one source file with another source file during assembly?
- A. EXTRN
  - B. PUBLIC
  - C. LINK
  - D. INCLUDE
36. Which of the following instructions is not a form of register indirect addressing?
- A. MOV AX,BX
  - B. MOV AX,[BX]
  - C. MOV AX,[SI] + TARGET
  - D. MOV AX,[BX + DI]

37. A structure is composed of:
- A. A group of data byte and/or word elements called fields.
  - B. A group of data bit-sized field elements within a byte- or word-sized framework.
  - C. A sequence of common byte or word data elements.
  - D. A table of symbols called field elements.
38. A record is composed of:
- A. A group of data byte and/or word elements called fields.
  - B. A group of data bit-sized field elements within a byte- or word-sized framework.
  - C. A sequence of common byte or word data elements.
  - D. A table of symbols called field elements.
39. Based addressing differs from register indirect addressing in that it uses only the:
- A. BX or BP registers.
  - B. SI or DI registers.
  - C. BX or BP registers plus a displacement.
  - D. SI or DI registers plus a displacement.
40. Which is an example of based index addressing?
- A. `ADD [SI+DI]+NUM1,CX`
  - B. `MOV AX,[BX+BP]+TABLE`
  - C. `INC WORD PTR [BP+DI]+TABLE`
  - D. `MOV DATA,[BX+BP].FONT`
41. Which of the following ASCII Adjust instructions is used prior to the mathematical operation?
- A. AAA
  - B. AAS
  - C. AAM
  - D. AAD

- 
42. Which of the following instructions is used to perform a byte translation?
- A. LAHF
  - B. SAHF
  - C. XLAT
  - D. XCHG
43. Which of the following is not considered a bit manipulation instruction?
- A. NOT
  - B. XOR
  - C. TEST
  - D. NEG
44. Which of the following logical instructions does not affect the Flag register?
- A. NOT
  - B. OR
  - C. XOR
  - D. TEST
45. Which of the following instruction combinations perform the same operation?
- A. SHR/SAR
  - B. SHL/SAL
  - C. ROR/RCR
  - D. ROL/RCL
46. Which segment register contents cannot be modified directly with program code?
- A. CS
  - B. DS
  - C. ES
  - D. SS

- 
47. The minimum number of segments that must be defined in a COM program is:
- A. 1
  - B. 2
  - C. 3
  - D. 4
48. The minimum number of segments that must be defined in an EXE program is:
- A. 1
  - B. 2
  - C. 3
  - D. 4
49. The default segment align-type is:
- A. BYTE
  - B. WORD
  - C. PARA
  - D. PAGE
50. The segment combine-type \_\_\_\_\_ must be used in the code segment statement when the code segment is part of a GROUP.
- A. STACK
  - B. PUBLIC
  - C. COMMON
  - D. AT
51. The variable port address for an input or output instruction is found by default in the \_\_\_\_\_ register.
- A. AX
  - B. BX
  - C. CX
  - D. DX

- 
52. The maximum number of fixed I/O ports is:
- A. 64
  - B. 128
  - C. 256
  - D. 512
53. Which interrupt has the highest priority?
- A. Divide error.
  - B. NMI
  - C. INTR
  - D. Single-step.
54. Which of the following interrupts will only generate a Type 4 interrupt if the Overflow flag is set?
- A. INTR
  - B. INTO
  - C. INT
  - D. INT 4
55. Which of the following interrupts is ignored when the Interrupt flag is cleared?
- A. NMI
  - B. INTO
  - C. INTR
  - D. INT 32
56. Which of the following string operations does not transfer any of the string elements?
- A. MOVS
  - B. LODS
  - C. STOS
  - D. SCAS

- 
57. Which of the following registers is used to specify the number of times a string instruction is repeated?
- A. BX
  - B. CX
  - C. DX
  - D. AX
58. Which of the following instructions is a conditional string instruction?
- A. CMPSB
  - B. REP SCAS
  - C. REPZ CMPS
  - D. SCASB
59. The SI register is incremented after each string operation when:
- A. DF is cleared.
  - B. DF is set.
  - C. TF is cleared.
  - D. TF is set.
60. Which of the following flags is used to terminate a conditional string operation?
- A. TF
  - B. ZF
  - C. IF
  - D. OF
61. The \_\_\_\_\_ instruction would be used to load the appropriate segment and index registers with the physical address of the destination string location in memory.
- A. LEA
  - B. LDS
  - C. LES
  - D. DD

- 
62. A procedure is identified by its beginning procedure directive statement and its ending \_\_\_\_\_ directive.
- A. END
  - B. ENDS
  - C. ENDM
  - D. ENDP
63. The maximum memory size a GROUP can occupy is:
- A. 1K byte
  - B. 16K bytes
  - C. 64K bytes
  - D. 1M byte
64. The conditional directive \_\_\_\_\_ will evaluate true if its expression is not zero.
- A. IF
  - B. IF1
  - C. IFDEF
  - D. IFDIF
65. The conditional directive \_\_\_\_\_ will evaluate true during pass one of the assembler.
- A. IF
  - B. IF1
  - C. IFDEF
  - D. IFDIF
66. The conditional directive \_\_\_\_\_ will evaluate true if its symbol has been defined.
- A. IF
  - B. IF1
  - C. IFDEF
  - D. IFDIF

67. The conditional directive \_\_\_\_\_ will evaluate true if its first argument doesn't agree with its second argument.
- A. IF
  - B. IF1
  - C. IFDEF
  - D. IFDIF
68. Which of the following macro directives can be called?
- A. MACRO
  - B. REPT
  - C. IRP
  - D. IRPC
69. The end of a conditional macro directive is identified by the directive:
- A. END
  - B. ENDM
  - C. ENDIF
  - D. EXITM
70. The directive \_\_\_\_\_ allows you to exit a macro before its end.
- A. END
  - B. ENDM
  - C. ENDIF
  - D. EXITM
71. The macro directive \_\_\_\_\_ contains one dummy parameter followed by a set of parameters that must be enclosed with a pair of angle brackets.
- A. MACRO
  - B. REPT
  - C. IRP
  - D. IRPC

- 
72. The macro directive \_\_\_\_\_ is used to create unique names or labels within a macro expansion.
- A. PURGE
  - B. LOCAL
  - C. REPT
  - D. IRPC
73. The macro operator \_\_\_\_\_ is used to concatenate text or symbols.
- A. !
  - B. <>
  - C. %
  - D. &
74. The directive \_\_\_\_\_ is used to begin a new numbering sequence in an assembler listing.
- A. PAGE
  - B. SUBTTL
  - C. PAGE+
  - D. TITLE
75. The directive \_\_\_\_\_ can be used to create a message during program assembly.
- A. PAGE
  - B. SUBTTL
  - C. %OUT
  - D. TITLE
