

OHIO! As long as we allow the politicians to control funding of our schools then our children are doomed. We need a constitutional amendment that forces OHIO to fund the children at a required amount per child based on location and cost of living, do not allow the politicians to determine cost of living. Funds that are generated from lotteries, Casino's etc. must use half the income for schools and cannot be used in lieu for general funds. All lottery proceeds etc. must be used for buildings and support structure not salaries.

Teacher salaries must come from the general funds only as do their raises. Health insurance should be reasonable and shared by the state and the individual. Performance responsibilities of a school system should go all the way to the top, the superintendent. It is a bunch of bull to give anyone a raise that does not perform. If a top administrator fails to perform then they should be fired or demoted. It is unthinkable that we keep unfit administrators and teachers in our system, There are too many good teachers waiting for the chance.

We need to stop the property tax funding of our schools. We pay enough sales tax and income tax to state and local governments; they need to live within their budget.

This is just a start, we need to get rid of career politicians and put in fiscally responsible lawmakers.
