

Index to REMark: 1988-1989

Jan Axelson
2209 Winnebago Street
Madison, WI 53704

The following pages contain an index to REMark for 1988-89. I made the index with PC-File Version 5.0, then converted it to a text file for publication in REMark.

If you prefer an electronic index, you can download REM8889.EXE from the COM1 BBS. REM8889.EXE is a self-extracting file that contains the REMark index in the form of a PC-File-compatible database. Or, send \$6 to Jan Axelson, 2209 Winnebago Street, Madison, WI 53704. I'll send you the files on a 5-1/4" 360K MS-DOS floppy.

Using REM8889 and PC-File, you can quickly search for occurrences of any topic or combination of topics you wish.

Note: To use the disk-based index, you must have PC-File Version 5.0 or a compatible database. (PC-File says its files are dBase-compatible, but I haven't confirmed this.)

Evaluation copies of PC-File V5.0 are available on many BBS's and from many mail-order sources, including The Public (Software) Library. A registration fee is requested. Or you can buy the software and printed manual directly. I got mine from PC Connection for \$75, which is much less than the normal registration fee of \$130.

REGULAR COLUMNS & FEATURES

Bug Zapping

- ZKB-2 keyboard, Z-319 with MFM V3.0, H-140 or Z-159 and monitor ROM memory test, H-150 keyboard, 84-key keyboard on Z-200 series, Z-386 with coprocessor, ZVM-1220, -

1230, -1240 monitors, ZCM-1490 monitor, Feb 89, p.63

- ZKB-2 keyboard, PREP, ZDH-1117-B0 & ZVM-1360, ZWL-200-2/4 & expanded memory, Z-286 & Paradise VGA, Z-315 & parity errors, Windows/386 with 1Mb, Z-159 & CGA, Z-159 memory boards, Z-159 & 1.2Mb drives, Z-159 & KEYBxxx, DIR & 720Kb drives, types of memory, Mar 89, p.30
- Replacing manuals, Z-180 & Sidekick, Apr 89, p.27
- Hard disk partitions, ZCM-1490, EGA on Z-150 or Z-160, Z-180 "+" & "-" keys, Z-525 cache memory, ZVM-1380, H/Z-100 & bad sectors, Z-150 & 3-1/2" drives, COM2 errors, battery care, Z-180 & mice, floppies & MS-DOS versions, SHIP, Z-386 monitor ROM number, May 89, p.63
- Powerhouse & H-386, H/Z-386 & MFM-300's TEST, ZWL-200-2(4) ROM #, ZDOS & MS-DOS disks, Out of Environment Space error, Z-180 keyboard, laptops & x-rays, Z-159 parallel port, Z-248/2200 & XT controllers, ZWL-200-2/4 & OS/2 or XENIX, V2.1 ROM errors, Jun 89, p.63
- Z-157-8-9 & 3.5" drives, Z-2200 and 20Mb hard drive, Z-386 serial port, reusing H/Z-248 parts after upgrading, ZVM-1380, ZVM-1390, erasing SETUP, background & foreground colors, Jul 89, p.42

Buggin' HUG (letters)

- Staunch 8/89'er, WORD & FANSI-Console follow-up, TREECOPY bug, changing WordStar directories, CP/EMulator II/ZEMulator bug, SHELL command, checking validity of dates, WordPerfect V4.2 bug, CHKDSK on Z-100, Feb 88, p.6
- Adding external drives to Z-151, patch for Peach Text 5000, Mar 88, p.7
- Assembler for NECV20, Apr 88, p.8
- Laptop solutions, 48/96 TPI drives & H/Z-100, CLE Command-line editor, date-validity subroutine, customizing

WordStar V4, WordPerfect resets clock to 2AM, Logitech mouse & WINDOWS for Z-100, PUP bugs, math checker, WordStar directories, patch for MASM V4, Jul 88, p.10

- Shared experiences with 8-bit users, obsolescence, HUGMCP V1.1 on an H-100 with DOS V3.1, patch for MASM V4.0, installing Irwin tape drive in Z-148, WordStar's shorthand, Aug 88, p.6 (MASM patch correction, Mar 89 p.6)
